

i think the "do not call" is the best idea the FCC has. i generally think the FCC has gone too far, examples being the banning of commercials, etc.. yet, soap operas contain the most inappropriate content.

DO NOT CALL is very important. i am tired of getting phone calls in the middle of the night by a recording of a vacuum cleaner company trying to sell their product. or by a telemarketer trying to collect money, or sell something, then getting nasty when i am not willing to listen. i have been harrassed by such callers. on more than 4 occasions, i have been called back, and told what to do to myself. these people would be in trouble with their careers if there numbers were shown on caller ID. the professionalism of todays' telemarketing has gone down hill. the rude and "far too many" calls need to stop. Please, i am the wife of a police officer, so when my phone rings in the middle of the night, and it is a unknown call, i nearly have a heart attack with worry.

KEEP the "DO NOT CALL" it should also be extended to include cell phones.

thanks
